

How to Stream Yakker Data to ProScoreboard

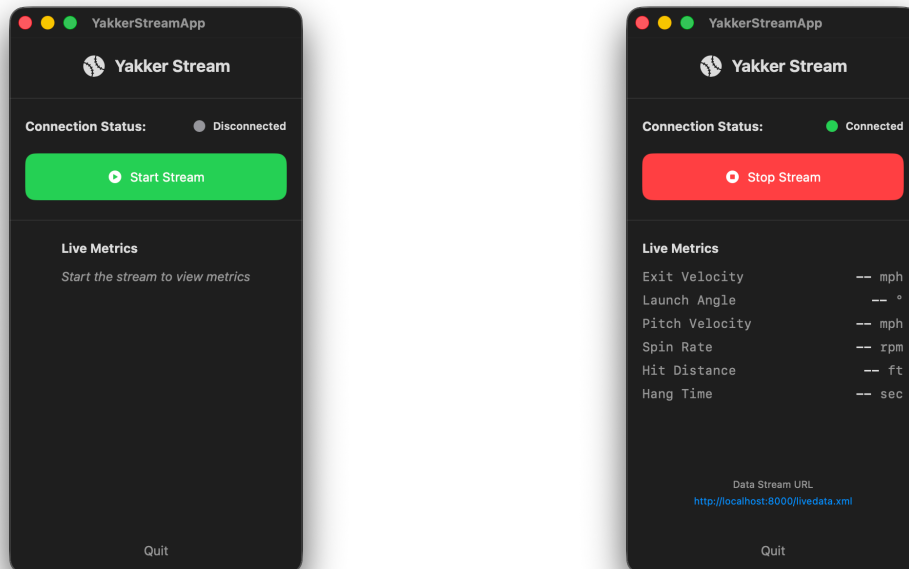

Yakker data enables the display of advanced baseball metrics like Exit Velo, Launch Angle, Spin Rate, etc. to the videoboard. Here's a how-to for streaming and syncing the data to ProScoreboard.

How-To

1. Click the YakkerStream app in the dock to open it

2. In the app, click the green **Start Stream** button

3. The Yakker data is now streaming to the **Data Stream URL** shown at the bottom of the window.
*If you get an error message, see the **Troubleshooting** section below.*

4. The Yakker data will be linked to the "Yakker" overlays in ProScoreboard. Display these on the videoboard to show the data in near-real-time. (Updates every 10 seconds)

Troubleshooting

If you can't find the YakkerStream app:

1. Open **Finder**
2. Open the **Documents** folder
3. Open the **yakker-stream** folder
4. Double-click **YakkerStreamApp.app**
5. With the app shown in the dock, right-click the app, go to Options, and click **Keep in Dock**

If the Start Stream button causes an error message

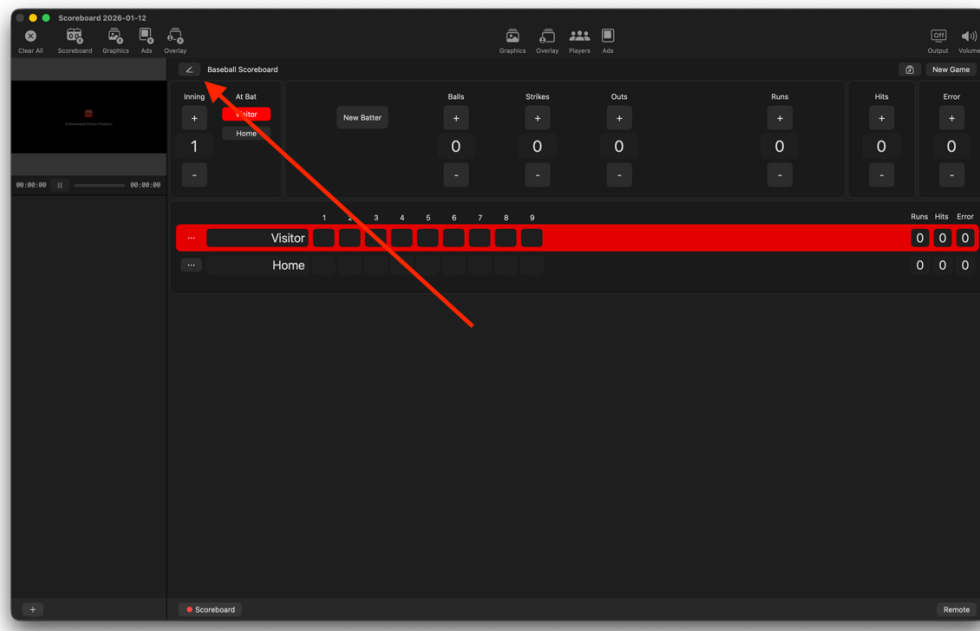

1. Click the quit button at the bottom of the window.
2. Re-open the YakkerStream app and try again.
3. If the connection still fails, quit the app again and restart the Mac.
4. If the connection still fails after a full reboot, call Chas Rogers at 325-486-6346 or 210-748-1164

If ProScoreboard Shows an Error

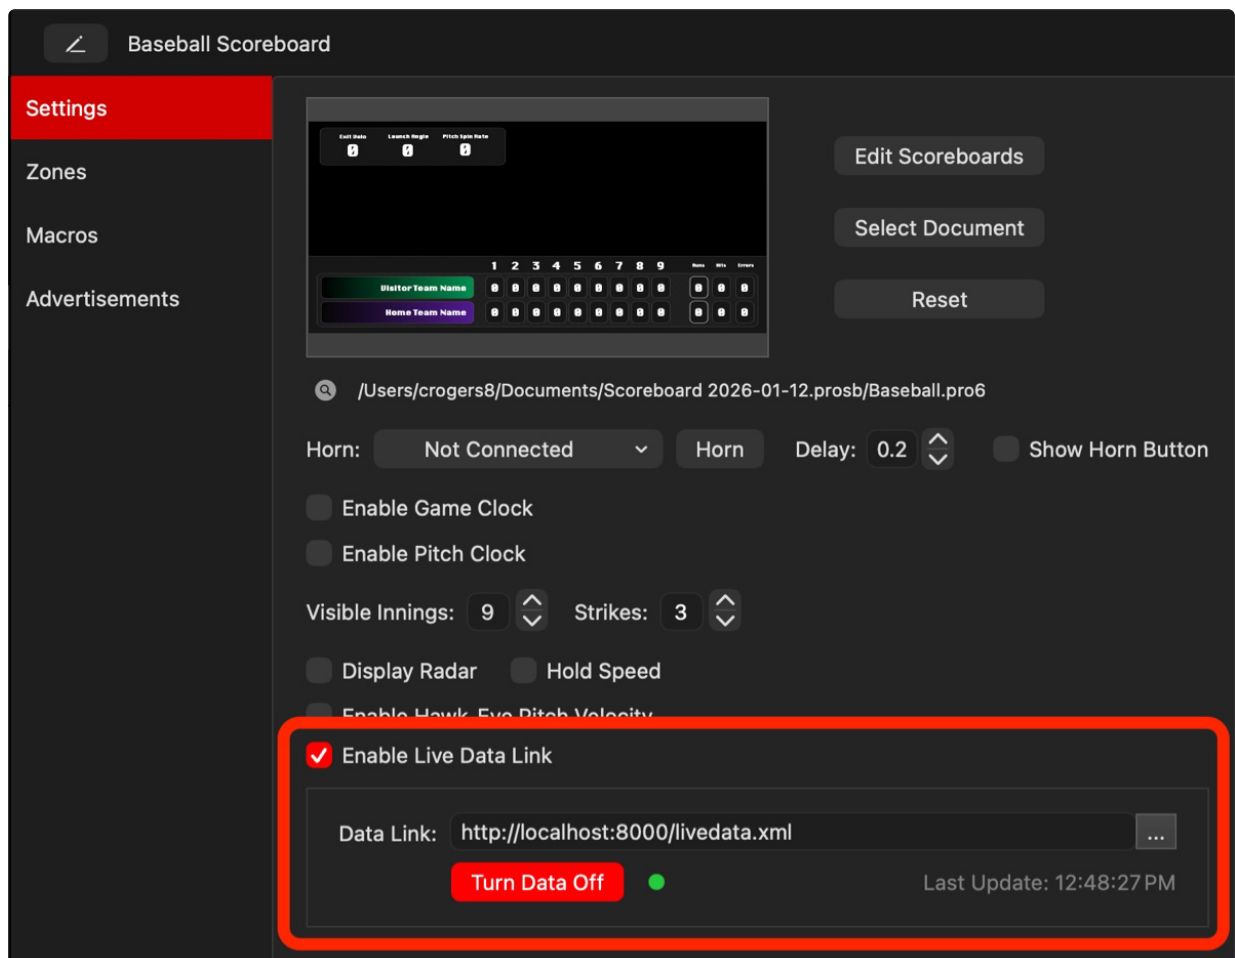

- Typically the error will be "No parser for: livedata.xml"
- This is usually because the Yakker Stream is not connected. Start the stream and see if the error goes away.

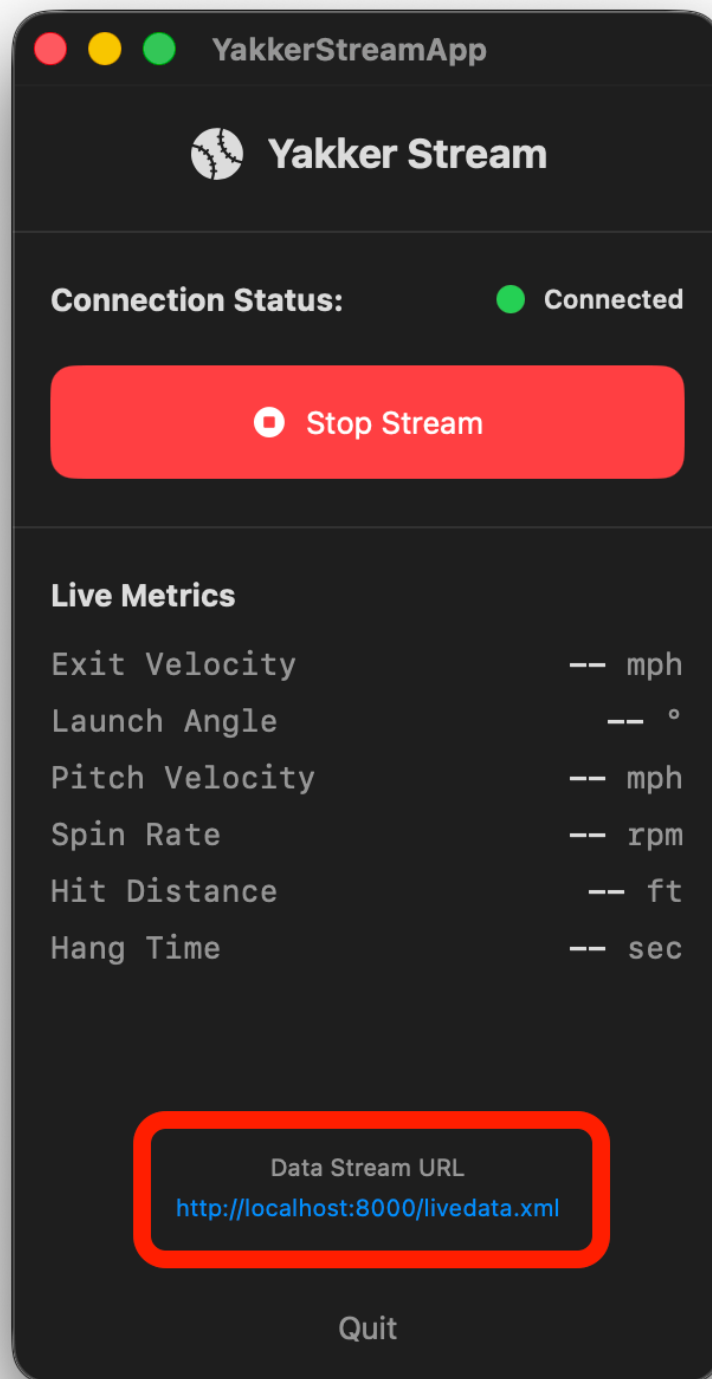

If the error persists, try the following:

1. In ProScoreboard, click the Pencil icon to the left of Baseball Scoreboard.

2. Check the **Live Data Link** settings at the bottom of the page.
3. Ensure the Data Link URL matches the one in the YakkerStream App

4. If the error still appears, click the **Turn Data Off** button and un-check **Enable Live Data Link**.
 - This will stop the error, but will prevent the Yakker data from streaming.

This is a custom-built ASU-only program built by Chas Rogers with ASU IT.

ProScoreboard or Videoboard support will not know how to assist with this program.
